PRESS RELEASE.

PRECISA SWISS QUALITY BALANCES.

Precisa have been manufacturing high quality precision weighing equipment in Switzerland since 1935.

Their wide range now includes systems ranging from low cost units ideal for teaching through to 5 figure analytical systems for the most demanding of applications. All supported with a world wide 2 year warranty.

So whether your need is for a 0.1gm readability balance or a 0.1mg balance call us for a competitive price on a high quality balance which is fully supported with after sales service and applications knowledge..

As well their range includes an innovative range of automated ashing and drying systems for labs requiring high throughput for thermogravimetric parameters. Up to 29 samples can be analysed automatically saving time and money. Operating to protocols acceptable to DIN, ASTM, ICC and others, the units produce reports conforming to GLP guidelines.
