# ON-TARGETPlus™ 2.0

The Future of siRNA Gene Silencing

horizon™  
INSPIRED CELL SOLUTIONS

Dharmacon™

The first systematic genome-scale update in 15 years. We've re-engineered the industry standard to align with the latest RefSeq transcript annotations, ensuring your research reflects today's genomic reality—no longer living in the bygone 2010's era.

- **Precision Targeting:** Realigned to current databases for isoform-aware accuracy (RefSeq databases).
- **Maximum Potency:** Enhanced SMARTpool™ designs for superior knockdown.
- **Proven Chemistry:** Retains the trusted ON-TARGETplus modification pattern.
- **Comprehensive Coverage:** Expanded Human, Mouse, and Rat libraries.

**DUE TO POPULAR DEMAND  
OFFER EXTENDED**

**Get 45% Off**

Upgrade your functional genomics with  
**cutting-edge SiRNA**

offer valid until 30th June, 2026

## SiRNA Formats Built for Your Research

### Smart Knockdown

ON-TARGETplus 2.0 SMARTpool™ siRNAs (human, mouse and rat)

### Versatile Options

ON-TARGETplus 2.0 individual siRNAs (human, mouse and rat)

### Efficient Libraries

ON-TARGETplus 2.0 Custom cherry-pick libraries (available at launch)

### Comprehensive Data

ON-TARGETplus 2.0 Human and mouse whole-genome and sub-family libraries (launch later in 2026)

**Engineered  
for  
Accuracy**
