

CONTAMINATION CONTROL SEMINAR

Join us for a seminar on how to prevent contamination in your incubators

Ross Redwin
0438 077 620
ross@scientific.com.au

Seminar Details

- Duration 1.5 hour
- Explore the common contaminants in cell culture incubators
- Explore the sources of contamination in cell culture incubators
- Explore the identification of specific contaminants in cell culture incubators
- Explore the range of decontamination processes available when a contamination is identified
- Give detailed information on how to avoid a re-occurrence of contamination in cell culture incubators

Presented by Ross Redwin - Service engineer with over 30 years' experience servicing scientific instrumentation and 20 years' experience on Ultra Low Temperature freezers
